1. This application is in condition for allowance except for the following formal matters:

A). Claim 35 is objected to under 37 CFR 1.75 as being a substantial duplicate of claim

32. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

2. Claims 1-13, 31-34 and 36-38 are allowed.

3. The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach or fairly suggest a method of manufacturing a telescope mirror comprising the steps of: (a) providing a mandrel defining the geometry of the telescope mirror, (b) depositing a reflective layer on the mandrel surface, (c) electroforming a mirror body onto the reflective layer by an electrochemical process, (d) releasing the mirror body with the reflective layer from the mandrel (10), (e) attaching to the mirror body a supporting structure comprising at least one of a ring geometry and at least one actuator for adapting and correcting the geometry of the telescope mirror, and wherein the electroforming process and the release process are controlled such that the building up of internal mechanism tension within the mirror body is suppressed, as recited in claims 1, 31 and 38.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
